4 Layer Compression Bandage System

McKesson 4 layer compression bandage system consists of a white padding bandage, natural white conforming bandage, white compression bandage, and a brown cohesive compression bandage. This is a non-sterile product for single use only. The McKesson 4 layer compression bandage system is indicated for long-term compression therapy for venous diseases and edema caused by other factors (in patients with an ABPI – ankle brachial pressure index – of 0.8–1.3). Positioning the four bandages in a layered combination forms a compression system, which can be worn for up to a week, depending on the condition of the wound and the time for which the wound dressing is worn.

- The product must be used on intact (uninjured) skin only. Wounds must be treated with a suitable wound dressing in advance.
- The McKesson 4 layer compression bandage system can be used by medical specialists in both clinical and domestic settings.

LAYER 2: COTTON BLEND
Smoothes the padding bandage

LAYER 4: COHESIVE SUPPORT
Adds to the compression effect and helps keep the bandages in place for up to 7 days

LAYER 1: PADDING
Redistributes pressure to aid in the management of venous insufficiencies

LAYER 3: COMPRESSION BANDAGE
Conforms to the leg contours

4 Layer Compression Bandage System

Features and Benefits

- Provides compression for up to 7 days when applied correctly
- Standard compression rating 30-40 mmHg
- Suitable for patients with ankle circumferences between 7-10 in
- Redistributes pressure to aid in the management of venous insufficiencies
- Conforms to leg contours
- Non-Sterile
- Not made with natural rubber latex
