DESCRIPTION
Thank you for purchasing the McKesson Compressor Nebulizer System. This product was developed for the successful treatment of asthma, allergies and other respiratory disorders. The compressor forces air to the nebulizer. When the air enters the nebulizer, it converts the prescribed medication into an aerosol of microscopic droplets that can easily be inhaled.

SAFETY INFORMATION
To assure the correct use of the product, basic safety measures should always be followed, including the warnings and cautions listed in this instruction manual.

WARNING
• The regimen of medication shall follow the instructions of your physician or licensed healthcare practitioner.
• Do not cover the compressor with a blanket, towel, or any other type of cover during use. This could result in the compressor overheating or malfunctioning.
• Do not use the device where the device may be exposed to flammable gas or vapors.
• Do not use mineral water in the nebulizer for nebulizing purposes.
• Always dispose of any remaining medication in the medication tank after each use. Use fresh medication each time you use the device.

CAUTION
• Limit the use of the device to 20 minutes at a time, and wait 40 minutes before using the device again.
• Provide close supervision when this device is used by, on, or near infants, children or compromised individuals.
• Do not insert any object into the compressor.
• Make sure that the air filter is clean. If the air filter has changed color or has not been used for 60 days, replace the filter.
• Make sure that the nebulizer kit is correctly assembled, the air filter is properly installed, and the air tube is correctly connected to the compressor and the nebulizer kit. Air may leak from the air tube during use if not securely connected.
• Inspect the compressor (main unit) and the nebulizer parts each time before using the device. Make sure no parts are damaged, the nozzle and air tube are not blocked and the compressor operates normally.
• Do not use the device if the air tube is bent.
• Do not block the air filter cover.
• Do not alter the baffle, the nozzle in the medication tank or any part of the nebulizer kit.
• Do not add more than 10ml of medication to the medication tank.
• Do not operate the device at temperatures greater than 40°C.
• Do not tilt the nebulizer kit so the angle of the kit is greater than 45º. Medication may flow into the mouth.
• Do not shake the nebulizer kit while using the device.
• Do not subject the compressor, or any of the components, to strong shocks, such as dropping it on the floor.
• This device is approved for human use only.
• Do not disassemble or attempt to repair the device or components.
• Use the device only for its intended use as described in the instruction manual. Do not use attachments not recommended by the manufacturer.
• Dispose of the device, components and optional accessories according to applicable local regulations. Unlawful disposal may cause environmental pollution.
• Make sure that the air tube is securely attached to the compressor (main unit) and nebulizer parts, and does not come loose. Twist the air tube slightly when inserting it into the connectors to avoid the tube disconnecting during use.

RISK OF ELECTRICAL SHOCK
• Do not use the compressor (main unit) and the power cord while they are wet.
• Do not plug or unplug the power cord into the electrical outlet with wet hands.
• Do not immerse the compressor (main unit) in water or other liquid.
• Do not spill water or other liquids on the compressor. These parts are not waterproof. If liquid spills on these parts, please unplug the power cord and wipe off the liquid with gauze or other soft absorbent material immediately.
• Do not use or store the device in humid locations or outdoors. Use the device within the operating temperature and humidity.
• Do not overload power outlets. Plug the device into the appropriate voltage outlet.
• Do not use extension cords. Plug the power cord directly into the appropriate voltage outlet.
• Unplug the power cord from the electrical outlet after using the device. Never leave this product unattended when plugged in.
• Unplug the power cord from the electrical outlet before cleaning the device.
• Read all of the instructions before using the accessories.
• The direction of movement of the actuator of the supply tube connector on the bottom of the nebulizer kit.
• To prevent the risk of cross infection, multiple people should not use the same nebulizer kit.
• If the device has not been used for a long period of time, please clean and disinfect the nebulizer kit and optional masks before using them.
• To prevent the risk of cross infection, multiple people should never use the same nebulizer kit.

1. At normal use, place the device on a stable, sturdy and flat surface horizontally, such that the unit can be easily reached when you are seated. CAUTION: Place the device at least 10cm distance from walls.
2. Make sure that the unit is in the "off" (O) position by pressing on the right side of switch.
3. Insert the power plug into the electrical outlet.
4. Rotate the inhalation top counterclockwise to remove the inhalation top from the medication tank.
5. Add the correct amount of prescribed medication to the medication tank.
6. Turn on the 0/1 button.
7. Insert the desired inhalation accessory.

ATTACHING THE AIR TUBE
1. Push the air plug on one end of the air tube onto the air connector on the front side of the compressor.
2. Push the air plug on the other end of the air tube onto the air connector on the bottom of the nebulizer kit.

USING THE DEVICE
1. Switch on the power.
2. Plug the inhalation tube into the air plug under cover of device.
3. Plug the other side of tube into the vent port of bottom of nebulizer kit.
4. Plug the nebulizer kit into the holder on the device.
5. Add the medicine into the nebulizer tank.
6. Turn on the 0/1 button.
7. Insert the desired inhalation accessory.
8. Press the 0/1 button to safely terminate the operation of the nebulizer.
9. Unplug the power cord from the electrical outlet after using the device.

CAUTION
The patient and operator must keep a distance from the device within 20cm to 50cm in normal use.

USING THE CHILD MASK OR THE ADULT MASK (SOLD SEPARATELY)
Place the mask over the nose and mouth. Pull the elastic strap over the head. Gently pull on the strap to securely hold the mask over the nose and mouth. Inhale the medication. Exhale normal breath into the bottom of the mask.

NOTE: Infant, child and adult masks can be purchased separately.
Infant: MFR #: 32641
Pediatric: MFR #: 32645
Adult: MFR #: 32642, 32643, or 32644

CLEANING AND DISINFECTING
Cleaning following the instructions after each use will prevent any remaining medication in the bottle from drying, resulting in the device not nebulizing effectively, and will help prevent infections. Wash the nebulizer parts after each use. Dry the parts immediately after washing.
1. Remove the inhalation accessory (mask or mouthpiece) from the nebulizer kit.
2. Disconnect the air tubing from the nebulizer.
3. Gently twist the inhalation top counterclockwise and lift to separate the nebulizer into two sections.
4. Remove the baffle.
5. Discard remaining medication.
6. Rinse all parts of the accessories (nebulizer kit, the mouthpiece and mask) in warm water and a mild detergent. Rinse thoroughly with lukewarm drinking water.
7. Hand dry or air dry in a clean environment using a soft, clean lint-free cloth.

CLEANING THE DEVICE AND THE TUBE'S OUTER SURFACE
1. Use a cloth dampened with antibacterial detergent (non-abrasive and free of solvents of any kind).
2. Assemble the nebulizer and store the nebulizer kit appropriately.

CAUTION: The nebulizer kit should be replaced every 6 months.

DISINFECTING
You can disinfect daily by soaking the parts in medical disinfectant which is commercially available in any pharmacies. If your physician or respiratory therapist specifies a different cleaning procedure, follow their instructions. Effective disinfection is only possible if the nebulizer has been cleaned. Disinfect accessories (nebulizer kit, mask, mouthpiece) after the last treatment of the day.
CARING FOR THE DEVICE
To keep your device in the best condition and protect the unit from damage, follow these directions:

1. Pull the air filter cover to remove from the front side of the compressor.
2. Remove the dirty filter with hand.
3. Insert a new air filter into the air filter cover.
4. Put the air filter cover back on the compressor.
5. Do not maintain or service the device while it is in use.

CAUTION
Do not attempt to wash or clean the nebulizer filter. Damp filters can cause blockages. Do not substitute cotton or any other material for the filter. Wash the nebulizer filter cover regularly to prevent any blockage in the cover. Do not boil. Make sure the cover is dry before inserting the new filter.

STORING THE DEVICE
Store the device in a safe, clean location. Do not store the device in extreme hot or cold temperature, high humidity or in direct sunlight.

WARNING
Do not leave the device or its parts where it will be exposed to extreme temperatures or changes in humidity, such as leaving the device in a vehicle during warm or hot months, or where it will be exposed to direct sunlight.

Keep the device out of the reach of unsupervised infants and children. The device may contain small parts that can be swallowed.

CAUTION
Do not carry or leave the nebulizer with medication in the medication tank. Do not disassemble or attempt to repair the device or components.

MAINTENANCE AND STORAGE
• Do not leave the cleaning solution in the nebulizer parts. Rinse the nebulizer parts with clean hot tap water after disinfecting.
• Wash the nebulizer parts after each use. Dry the parts immediately after washing.
• Do not store the air tube with moisture or medication remaining in the air tube. This could result in infection as a result of bacteria.
• Store the device and the components in a clean, safe location.
• Do not carry or leave the nebulizer with medication in the medication tank.
• Do not place or attempt to dry the device, components or any of the nebulizer parts in a microwave oven.
• Do not wrap the power cord around the compressor (main unit).

CLASSIFICATION
Equipment Classification with respect to protection from electric shock: CLASS II
Degree of protection from electric shock: TYPE BF
Degree of protection against ingress of water is rated as IPX0.
Equipment not suitable for use in the presence of flammable anesthetic mixture with air, oxygen or nitrous oxide.
Intermittent operation: 20 minutes ON, 40 Minutes OFF.

SPECIFICATIONS

TROUBLESHOOTING

PROBLEM
No power on unit when the power switch is on.

CAUSE
The AC power cord is not plugged into an electrical outlet.

SOLUTION
Turn the power switch off. Plug the power plug into an electrical outlet. Turn the device on.

1. No medication in the medication tank. Too much or too little medication in the medication tank.
2. The nebulizer kit is not correctly assembled. Make sure the nebulizer kit is correctly assembled and the inhalation accessory is correctly attached.
3. The nebulizer kit is tilted at an incorrect angle. Hold the nebulizer kit correctly. Do not tilt the nebulizer kit so the angle of the kit is greater than 45 degrees.
4. The air tube is incorrectly attached. Make sure the air tube is correctly attached to the compressor and the nebulizer kit.
5. The air tube is folded or damaged. The air tube is blocked. Make sure the air tube is not folded, kinked or bent. Respect the air tube for any damage. Replace the air tube if damaged.
6. The device is very hot. Do not cover the compressor with any type of cover during use. Turn the device off. Wait 60 minutes before using the device again.

COMPRRESSOR NEBULIZER SYSTEM
With respect to electric shock, fire and mechanical hazards, only in accordance with IEC60601-1.
