

McKesson absorbent floor pads help maintain cleaner, safer clinical environments by quickly absorbing and retaining fluids during procedures. Each pad features a multi-layer construction with spunbond and melt-blown materials, combined with a fluid-barrier backing to keep floors protected and dry. For single-use convenience, these pads support operating room efficiency while helping reduce the risk of slips and falls. Non-sterile and not made with natural rubber latex, they help provide dependable performance across a range of absorbency levels and sizes.

Features and Benefits

MULTI-LAYER CONSTRUCTION

Features spunbond top layer, melt-blown polypropylene middle layer, and fine-fiber melt-blown polypropylene bottom layer for efficient fluid absorption and retention

FLUID-BARRIER BACKING

Helps keep the floor beneath dry and clean by preventing fluid strike-through

ENHANCES STAFF SAFETY

Helps reduce the risk of slips and falls caused by wet floors

SUPPORTS OPERATING ROOM EFFICIENCY

Rapid fluid absorption helps enable faster OR turnover times

SINGLE-USE AND NON-STERILE

Convenient, disposable pads for easy cleanup and reduced cross-contamination risk

NOT MADE WITH NATURAL RUBBER LATEX
