Nasal Cannulas

McKesson

McKesson nasal cannulas provide reliable oxygen delivery with a broad selection of configurations to support diverse patient needs across care settings. The nasal piece is made of soft plastic for patient comfort. These single-patient-use cannulas feature crush-resistant tubing to help maintain uninterrupted oxygen flow and are available with multiple prong styles, comfort-enhancing options, and connector configurations. Universal oxygen connectors on select models support compatibility with a wide range of oxygen concentrators, while over-the-ear comfort features help minimize friction and aid in reducing pressure ulceration. Not made with natural rubber latex, the product family offers clinicians a dependable solution for oxygen therapy with options tailored to adult and pediatric patients.
