McKESSON

PREVENT® *A*

# Safety Blood Collection Set **ACTIVATE**

McKesson's Prevent® *A* safety blood collection set helps enhance safety and efficiency during venipuncture procedures. This single-use, sterile device features a self-activating safety door that automatically encloses the needle after venipuncture, helping protect healthcare professionals from accidental needlestick injuries. Available in three configurations with needle gauges 21, 23, and 25, each set includes a winged housing unit, needle hub, flexible tubing, and a female luer connector for secure connection to blood collection tubes or culture bottles. Engineered with a sharps injury prevention mechanism, the needle is fully retracted and permanently locked inside the housing after use, preventing reuse and ensuring safe disposal. Indicated for general medical use under professional supervision, Prevent® *A* combines reliability, safety, and convenience for blood collection in adolescent and adult patients.

## FEATURES AND BENEFITS

### Integrated Safety Mechanism

- Needle retracts fully into the housing after use and is permanently locked in place—preventing re-use, reducing the risk of accidental needlesticks, and exposure to blood

### Three Configurations

- Available in 21G, 23G, and 25G needle sizes to accommodate a range of patient needs and clinical preferences

### Winged Housing with Flexible Tubing

- Each set includes a winged needle hub, flexible tubing, and a female luer connector for secure, stable connections

### Versatile Application

- Compatible with blood collection tubes and blood culture bottles
- Ideal for use in hospitals, clinics, and other healthcare facilities

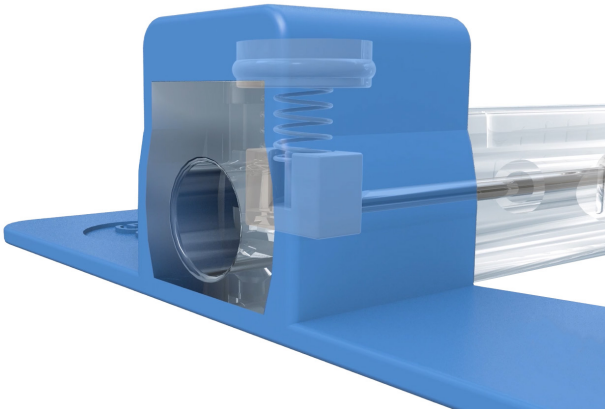

### Patient & Clinician Protection

- Designed for use under direct supervision of medical professionals with adolescent and adult patients

### Sterile & Single-Use

- Ensures hygienic, contamination-free procedures
- Non-reusable
- 5-year expiration date
- For Prescription use only
- Not made with natural rubber latex

**SELF-ACTIVATING DOOR TO ENCLOSE NEEDLE AFTER VENIPUNCTURE**
