Safety Data Sheet

Section 1: Identification

Product identifier

Product Name  •  Atropine Sulfate Ophthalmic Ointment
Product Code  •  AB05134; Core No. 051; NDC 24208-0825-55

Relevant identified uses of the substance or mixture and uses advised against

Recommended use  •  Finished Pharmaceutical Product; Atropine sulfate ophthalmic solution is used to produce mydriasis (pupil dilation).
Restrictions on use  •  Refer to the product insert and/or prescribing information for restrictions on use and contraindications.

Details of the supplier of the safety data sheet

Manufacturer  •  Bausch & Lomb
                 1400 North Goodman Street
                 Rochester, NY 14609
                 United States
                 bausch.com

Telephone (General)  •  1-800-553-5340

Emergency telephone number

Manufacturer  •  1-800-535-5053 - Infotrac

This safety data sheet is written to provide health, safety and environmental information for people handling this formulated product in the workplace. It is not intended to provide information relevant to consumer use of the product.

Section 2: Hazard Identification

UN GHS

According to: UN Globally Harmonized System of Classification and Labelling of Chemicals (GHS)

Classification of the substance or mixture

UN GHS  •  Classification criteria not met

Label elements

UN GHS

Precautionary statements

Storage/Disposal  •  Keep tightly closed. Store at room temperature 15-25°C (59-77°F), to maintain product integrity. Use before date marked on carton and/or container.

Other hazards

UN GHS  •  No data available.
Section 3 - Composition/Information on Ingredients

Substances

- Material does not meet the criteria of a substance according to United Nations Globally Harmonized System of Classification and Labelling of Chemicals (GHS)

Mixtures

The exact percentage of composition has been withheld as a trade secret.

Section 4: First-Aid Measures

Description of first aid measures

Inhalation
- No specific treatment is necessary since this material is not likely to be hazardous by inhalation. If exposed to excessive levels of mists, remove to fresh air and get medical attention if cough or other symptoms develop.

Skin
- IF ON SKIN (and not prescribed): Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention.

Eye
- If discomfort or irritation develops, immediately discontinue product use and contact your eye care professional.

Ingestion
- If swallowed, get medical help or contact a Poison Control Center immediately.

Most important symptoms and effects, both acute and delayed
- Systemic atropine toxicity is manifested by flushing and dryness of the skin (a rash may be present in pediatric patients), blurred vision, a rapid and irregular pulse, fever, abdominal distension in infants, mental aberration (hallucinosis) and loss of neuromuscular coordination.

Indication of any immediate medical attention and special treatment needed

Notes to Physician
- Atropine poisoning, although distressing, is rarely fatal, even with large doses of atropine, and is self-limited if the cause is recognized and the atropine medication is discontinued. In severe intoxication, physostigmine salicylate may be administered parenterally to provide more prompt relief of the intoxication. Give physostigmine salicylate as 1-5 mL IV of dilution containing 1 mg in 5 mL of saline. The smaller dose is for pediatric patients, and injection should take not less than two minutes. EKG control is advisable. Dosage can be repeated every five minutes up to a total dose of 2 mg in pediatric patients and 6 mg in adults every 30 minutes. Physostigmine is contraindicated in hypotensive reactions. Atropine (1 mg) should be available for immediate injection if physostigmine causes bradycardia, convulsions or bronchoconstriction. In pediatric patients, the body surface must be kept moist.
Section 5: Fire-Fighting Measures

Extinguishing media

Suitable Extinguishing Media
- Water spray, carbon dioxide, dry chemical powder, or appropriate foam for surrounding fire.

Unsuitable Extinguishing Media
- No data available.

Firefighting Procedures
- As in any fire, wear self-contained breathing apparatus and full protective gear.

Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards
- None known.

Hazardous Combustion Products
- None known.

Advice for firefighters
- Refer to Section 5 Firefighting Procedures.

Section 6 - Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Personal Precautions
- No special controls or personal protection required under conditions of intended use. In the event of bulk spills, wear suitable protective eyewear, clothing, protective boots and protective gloves. Evacuate immediate area. Ensure adequate ventilation. Refer to Section 8.

Emergency Procedures
- No emergency procedures are expected to be necessary when used in accordance with product literature.

Environmental precautions
- No data available on the environmental impact of this product.

Methods and material for containment and cleaning up

Containment/Clean-up Measures
- Contain spilled product. For small spills, add suitable absorbent material. Scoop up and place in an appropriate liquid-tight container equipped with a tight cover for disposal. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate, liquid-tight container equipped with a tight cover for disposal.

Prohibited Materials
- None known.

Reference to other sections
- Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

Section 7 - Handling and Storage

Precautions for safe handling

Handling
- When using this product: do not touch tip of container to any surface to avoid contamination, remove contact lenses before using, and always replace the cap after use. Use only in accordance with product literature.

Conditions for safe storage, including any incompatibilities

Storage
- Keep tightly closed. Store at room temperature 15-25°C (59-77°F), to maintain product integrity. Use before date marked on carton and/or container.
Special Packaging Materials
- Maintain product in original container only.

Incompatible Materials or Ignition Sources
- None specified.

Section 8 - Exposure Controls/Personal Protection

Control parameters
Exposure Limits/Guidelines
- Refer to the occupational exposure limits / guidelines for the individual product components.

Exposure Control Notations
ACGIH
- Mineral oil (8012-95-1): Carcinogens: (A4 - Not Classifiable as a Human Carcinogen (highly and severely refined); A2 - Suspected Human Carcinogen (poorly and mildly refined))

Exposure controls
Engineering Measures/Controls
- No special controls are required under conditions of intended use. Local exhaust ventilation should be provided when handling bulk product.

Personal Protective Equipment
Respiratory
- No special controls or personal protection required under conditions of intended use. In the event of a bulk spill, a NIOSH-certified air-purifying respirator equipped with HEPA-organic vapor cartridges may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits and when adequate oxygen is present. Use a positive pressure air-supplied respirator if there is any potential for an uncontrolled release or any other circumstances where air purifying respirators may not provide adequate protection.

Eye/Face
- No special personal protection required under conditions of intended use. In the event of a bulk spill, appropriate eye protection should be worn.

Hands
- No special personal protection required under conditions of intended use. In the event of a bulk spill, wear rubber or nitrile gloves.

Skin/Body
- No special personal protection required under conditions of intended use. In the event of a bulk spill, wear appropriate protective clothing.

Thermal hazards
- None known.

General Industrial Hygiene Considerations
- Wash thoroughly with soap and water after handling.

Environmental Exposure Controls
- No special controls are required under conditions of intended use. In the event of a bulk spill, prevent spilled material from entering storm sewers or drains, waterways, and contact with the soil.

**Section 10: Stability and Reactivity**

**Reactivity**

- Stable under normal temperatures and pressures.

**Chemical stability**

- Stable when stored at room temperature 15-25°C (59-77°F). Use before expiration date marked on carton and/or container.

**Possibility of hazardous reactions**

- Will not occur.

**Conditions to avoid**

- Extreme heat or cold. Do not freeze.

**Incompatible materials**

- None known.

**Hazardous decomposition products**

- None known.

### Potential Health Effects

#### Inhalation
- **Acute (Immediate)**: No hazard when used as directed.
- **Chronic (Delayed)**: No data available.

#### Skin
- **Acute (Immediate)**: Not expected to cause skin irritation.
- **Chronic (Delayed)**: No data available.

#### Eye
- **Acute (Immediate)**: Non-irritating to the eyes when used as directed.
- **Chronic (Delayed)**: Prolonged use may produce local irritation characterized by follicular conjunctivitis, vascular congestion, edema, exudate, and an eczematoid dermatitis.

#### Ingestion
- **Acute (Immediate)**: May be harmful if swallowed.
- **Chronic (Delayed)**: No data available.

### Section 12 - Ecological Information

#### Toxicity
- This material has not been tested for environmental effects.

#### Persistence and degradability
- No data available.

#### Bioaccumulative potential
- No data available.

#### Mobility in Soil
- No data available.

#### Other adverse effects

### Section 13 - Disposal Considerations
Waste treatment methods

Product waste
- Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator.

Packaging waste
- Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.
