Section 1. Identification

GHS product identifier: Emit 2000 Valproic Acid Assay
Product code: 4G019, OSR4G229, RG329, RG359, 10485119, 10485118, 06592706
Other means of identification: Emit® 2000 Valproic Acid Assay, Reagent 1 4G019, OSR4G229, RG319, JG319
Emit® 2000 Valproic Acid Assay, Reagent 2 4G019, OSR4G229, RG349, JG349
Product type: Liquid.

Relevant identified uses of the substance or mixture and uses advised against
Not applicable.

Manufactured/supplied: Siemens Healthcare Diagnostics Inc.
511 Benedict Avenue
Tarrytown, NY 10591-5097 USA
1-877-229-3711
(800) 424-9300 (CHEMTREC) (24/365)

Section 2. Hazards identification

OSHA/HCS status: Emit® 2000 Valproic Acid Assay, Reagent 1 This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Emit® 2000 Valproic Acid Assay, Reagent 2 This material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture: Emit® 2000 Valproic Acid Assay, Reagent 1 SKIN SENSITIZATION - Category 1
Emit® 2000 Valproic Acid Assay, Reagent 2 Not classified.

GHS label elements

Hazard pictograms: ![Exclamation Mark]

Signal word: Emit® 2000 Valproic Acid Assay, Reagent 1 Warning
Emit® 2000 Valproic Acid Assay, Reagent 2 No signal word.

Hazard statements: Emit® 2000 Valproic Acid Assay, Reagent 1 H317 - May cause an allergic skin reaction.
Emit® 2000 Valproic Acid Assay, Reagent 2 No known significant effects or critical hazards.

Precautionary statements

Prevention: Emit® 2000 Valproic Acid Assay, Reagent 1 P272 - Contaminated work clothing should not be allowed out of the workplace.
P280 - Wear protective gloves/protective clothing/eye protection/face protection.
Emit® 2000 Valproic Acid Assay, Reagent 2 Not applicable.

Response: Emit® 2000 Valproic Acid Assay, Reagent 1 P302 + P352 + P363 - IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse.
P333 + P313 - If skin irritation or rash occurs: Get medical attention.
Emit® 2000 Valproic Acid Assay, Reagent 2 Not applicable.

Date of issue/Date of revision: 7/27/2015
Date of previous issue: 6/30/2015
Version: 1.03
Section 2. Hazards identification

**Storage:**
- Emit® 2000 Valproic Acid Assay, Reagent 1: Not applicable.
- Emit® 2000 Valproic Acid Assay, Reagent 2: Not applicable.

**Disposal:**
- Emit® 2000 Valproic Acid Assay, Reagent 1: P501 - Dispose of contents and container in accordance with all local, regional, and national regulations.
- Emit® 2000 Valproic Acid Assay, Reagent 2: Not applicable.

**Supplemental label elements:**
- Emit® 2000 Valproic Acid Assay, Reagent 1: None known.
- Emit® 2000 Valproic Acid Assay, Reagent 2: None known.

**Hazards not otherwise classified:**
- Emit® 2000 Valproic Acid Assay, Reagent 1: None known.
- Emit® 2000 Valproic Acid Assay, Reagent 2: None known.

Section 3. Composition/information on ingredients

**Substance/mixture:**
- Emit® 2000 Valproic Acid Assay, Reagent 1: Mixture
- Emit® 2000 Valproic Acid Assay, Reagent 2: Mixture

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

**Occupational exposure limits, if available, are listed in Section 8.**

Section 4. First aid measures

**Description of necessary first aid measures**

**Eye contact**
- Emit® 2000 Valproic Acid Assay, Reagent 1: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.
- Emit® 2000 Valproic Acid Assay, Reagent 2: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

**Inhalation**
- Emit® 2000 Valproic Acid Assay, Reagent 1: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
- Emit® 2000 Valproic Acid Assay, Reagent 2: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition...
Section 4. First aid measures

Skin contact: 
- **Emit® 2000 Valproic Acid Assay, Reagent 1**
  - Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.

- **Emit® 2000 Valproic Acid Assay, Reagent 2**
  - Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion: 
- **Emit® 2000 Valproic Acid Assay, Reagent 1**
  - Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

- **Emit® 2000 Valproic Acid Assay, Reagent 2**
  - Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

**Potential acute health effects**

- **Eye contact**
  - Emit® 2000 Valproic Acid Assay, Reagent 1: No known significant effects or critical hazards.
  - Emit® 2000 Valproic Acid Assay, Reagent 2: No known significant effects or critical hazards.

- **Inhalation**
  - Emit® 2000 Valproic Acid Assay, Reagent 1: Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.
  - Emit® 2000 Valproic Acid Assay, Reagent 2: Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

- **Skin contact**
  - Emit® 2000 Valproic Acid Assay, Reagent 1: May cause an allergic skin reaction.
  - Emit® 2000 Valproic Acid Assay, Reagent 2: No known significant effects or critical hazards.

Date of issue/Date of revision: 7/27/2015. Date of previous issue: 6/30/2015. Version: 1.03.
Section 4. First aid measures

Ingestion:
- Emit® 2000 Valproic Acid Assay, Reagent 1: No known significant effects or critical hazards.
- Emit® 2000 Valproic Acid Assay, Reagent 2: No known significant effects or critical hazards.

Over-exposure signs/symptoms:
- Eye contact: Emit® 2000 Valproic Acid Assay, Reagent 1: No specific data.
- Inhalation: Emit® 2000 Valproic Acid Assay, Reagent 1: No specific data.
- Skin contact: Emit® 2000 Valproic Acid Assay, Reagent 1: Adverse symptoms may include the following:
  - irritation
  - redness

Specific treatments:
- No specific treatment.

Protection of first-aiders:
No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

Notes to physician:
- In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments:
- No specific treatment.

Protection of first-aiders:
No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

Section 5. Fire-fighting measures

Extinguishing media:
- Suitable extinguishing media: In case of fire, use water spray (fog), foam or dry chemical.
- Unsuitable extinguishing media: None known.

Specific hazards arising from the chemical:
- Hazardous thermal decomposition products: Decomposition products may include the following materials:
  - carbon dioxide
  - carbon monoxide
  - nitrogen oxides
  - phosphorus oxides

Special protective actions for fire-fighters:
- Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters:
- Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures:
- For non-emergency personnel: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

See toxicological information (Section 11)
Section 6. Accidental release measures

For emergency responders: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits
None.

Appropriate engineering controls: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures
Section 8. Exposure controls/personal protection

**Hand protection**
Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

**Eye/face protection**
Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. The protection time of the gloves cannot be accurately estimated.

**Skin protection**

**Chemical-resistant, impervious gloves** complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. The protection time of the gloves cannot be accurately estimated.

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. The protection time of the gloves cannot be accurately estimated.

**Body protection**
Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Other skin protection**
Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

**Physical state**
- Emit® 2000 Valproic Acid Assay, Reagent 1 Liquid.
- Emit® 2000 Valproic Acid Assay, Reagent 2 Liquid.

**Color**

**Odor**
- Emit® 2000 Valproic Acid Assay, Reagent 1 Odorless.
- Emit® 2000 Valproic Acid Assay, Reagent 2 Odorless.

**pH**
- Emit® 2000 Valproic Acid Assay, Reagent 1 6 [Conc. (% w/w): 1%]
- Emit® 2000 Valproic Acid Assay, Reagent 2 7.6 [Conc. (% w/w): 1%]

**Flash point**
- Emit® 2000 Valproic Acid Assay, Reagent 1 [Product does not sustain combustion.]
- Emit® 2000 Valproic Acid Assay, Reagent 2 [Product does not sustain combustion.]

**Flammability (solid, gas)**
- Emit® 2000 Valproic Acid Assay, Reagent 1 Not available.
- Emit® 2000 Valproic Acid Assay, Reagent 2 Not available.

**Relative density**
- Emit® 2000 Valproic Acid Assay, Reagent 1 1.012
- Emit® 2000 Valproic Acid Assay, Reagent 2 Not available.

**Solubility in water**
- Emit® 2000 Valproic Acid Assay, Reagent 1 Not available.
- Emit® 2000 Valproic Acid Assay, Reagent 2 Not available.

**Partition coefficient: n-octanol/water**
- Emit® 2000 Valproic Acid Assay, Reagent 1 Not available.
- Emit® 2000 Valproic Acid Assay, Reagent 2 Not available.

**Auto-ignition temperature**
- Emit® 2000 Valproic Acid Assay, Reagent 1 Not available.
- Emit® 2000 Valproic Acid Assay, Reagent 2 Not available.

**Viscosity**
- Emit® 2000 Valproic Acid Assay, Reagent 1 Not available.
- Emit® 2000 Valproic Acid Assay, Reagent 2 Not available.
Section 10. Stability and reactivity

Reactivity
: Emit® 2000 Valproic Acid Assay, Reagent 1
No specific test data related to reactivity available for this product or its ingredients.
Emit® 2000 Valproic Acid Assay, Reagent 2
No specific test data related to reactivity available for this product or its ingredients.

Chemical stability
: Emit® 2000 Valproic Acid Assay, Reagent 1
The product is stable.
Emit® 2000 Valproic Acid Assay, Reagent 2
The product is stable.

Possibility of hazardous reactions
: Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid
: No specific data.

Incompatible materials
: No specific data.

Hazardous decomposition products
: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Potential acute health effects

Eye contact:
Emit® 2000 Valproic Acid Assay, Reagent 1: No known significant effects or critical hazards.
Emit® 2000 Valproic Acid Assay, Reagent 2: No known significant effects or critical hazards.

Inhalation:
Emit® 2000 Valproic Acid Assay, Reagent 1: Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.
Emit® 2000 Valproic Acid Assay, Reagent 2: Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

Skin contact:
Emit® 2000 Valproic Acid Assay, Reagent 1: May cause an allergic skin reaction.
Emit® 2000 Valproic Acid Assay, Reagent 2: No known significant effects or critical hazards.

Ingestion:
Emit® 2000 Valproic Acid Assay, Reagent 1: No known significant effects or critical hazards.
Emit® 2000 Valproic Acid Assay, Reagent 2: No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact:
Emit® 2000 Valproic Acid Assay, Reagent 1: No specific data.
Emit® 2000 Valproic Acid Assay, Reagent 2: No specific data.

Inhalation:
Emit® 2000 Valproic Acid Assay, Reagent 1: No specific data.
Emit® 2000 Valproic Acid Assay, Reagent 2: No specific data.

Skin contact:
Emit® 2000 Valproic Acid Assay, Reagent 1: Adverse symptoms may include the following: irritation, redness.

Ingestion:
Emit® 2000 Valproic Acid Assay, Reagent 2: No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects:
Emit® 2000 Valproic Acid Assay, Reagent 1: Not available.
Emit® 2000 Valproic Acid Assay, Reagent 2: Not available.

Date of issue/Date of revision: 7/27/2015.
Date of previous issue: 6/30/2015.
Version: 1.03.
8/13.
Section 11. Toxicological information

**Potential delayed effects**
Not available.

**Long term exposure**
Not available.

**Potential immediate effects**
Not available.

**Potential delayed effects**
Not available.

**Potential chronic health effects**

**Conclusion/Summary**
Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

**General**
No known significant effects or critical hazards.

**Carcinogenicity**
No known significant effects or critical hazards.

**Mutagenicity**
No known significant effects or critical hazards.

**Teratogenicity**
No known significant effects or critical hazards.

**Developmental effects**
No known significant effects or critical hazards.

**Fertility effects**
No known significant effects or critical hazards.

**Numerical measures of toxicity**

**Acute toxicity estimates**
Not available.

**Potential delayed effects**

**Emit® 2000 Valproic Acid Assay, Reagent 1**
Not available.

**Emit® 2000 Valproic Acid Assay, Reagent 2**
Not available.

**Potential immediate effects**

**Emit® 2000 Valproic Acid Assay, Reagent 1**
Not available.

**Emit® 2000 Valproic Acid Assay, Reagent 2**
Not available.

**Other information**

**Section 12. Ecological information**

**Toxicity**
Not available.

**Conclusion/Summary**

**Persistence and degradability**

**Conclusion/Summary**

**Bioaccumulative potential**
Not available.

**Mobility in soil**

**Soil/water partition coefficient (Koc)**

**Mobility**

**Other adverse effects**
No known significant effects or critical hazards.

**Section 13. Disposal considerations**

**Disposal methods**
The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been
### Section 13. Disposal considerations

Emit 2000 Valproic Acid Assay

Cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Sodium azide may react with lead or copper plumbing to form highly explosive metal azides.
