Re: Material Safety Data Sheets

Per your recent inquiry, please be advised that *Material Safety Data Sheets* are not applicable to products like surgical / examination gloves, wound dressings, ostomy pouches, etc. Such medical devices are considered "articles" under OSHA's Hazard Communication Standard and will not release hazardous chemicals under normal conditions of use.

Accordingly, OSHA exempts these type products from Material Safety Data Sheet requirements. Therefore, we do not have MSDS sheets for the above referenced product(s).

If you have additional questions about this matter or if we can be of further service to you, please do not hesitate to contact us.

Sincerely,

Customer Care Representative
