

IMPORTANT SDS INFORMATION FOR Sysmex Hematology Controls, Calibrators, and Linearity Products

Dear Customer:

The above products are manufactured by Streck and do not contain any hazardous chemicals at concentrations of 1% or greater. Furthermore, these products do not contain any known carcinogens at concentrations of 0.1% or greater. As a result, Safety Data Sheets are not required [ref. 29CFR 1910.1200 (d) (5)].

Products comply with all applicable regulations of the U.S. Department of Transportation (DOT), and/or International Air Transportation Association (IATA), and do not meet criteria for restricted transport.

Streck's products are classified as *in vitro* diagnostics and regulated by the FDA. Accordingly, all applicable precautions are stated on the product label or package insert that accompanies each product.

Streck suggests you place a copy of this letter in any place you would ordinarily keep an SDS. This step will document your laboratory's compliance with OSHA requirements.

Streck Safety Administrator
