

Cordless Monitor for Fall & Wandering Prevention

The CordLess® Fall Monitor is wireless and can be placed away from residents to eliminate in-room alarm noise. Easily mount the monitor at the bedside or in a hallway up to 40 feet away.

New Features

- **Hold Mode** - Allows the caregiver to pause alerts while they tend to the resident without causing the monitor to alert
- **Extended Wireless Range** - Works up to 40 feet away, depending on environmental factors
- **Upgraded Transmitter** - Works with our new transmitter that allows custom delay times for each pad
- **Streamlined Design** - Built-in antenna cannot be accidentally removed

Same Trusted Safety Features

- **Quieter Monitoring** - Adjustable volume and remote placement keep noise away from residents
- **Pad Signal Lost Notification** - Alerts if signal between sensor pad and monitor is lost
- **Cordless Design** - Reduce tripping hazards and eliminates broken or tangled pad cords
- **TamperProof™ Caregiver Key** - Optional setting to control who can reset the monitor
- **Bright Alert Light** - Easy to see from a distance
- **Dual Monitoring** - Pair up to two components at once, including bed pads, chair pads, floor mats, or motion sensors
- **Power Options** - Uses 3 AA batteries (not included) or optional AC adapter (AC-05)
